

ST. CLEMENT'S IS THE MOST POLLUTED STREET IN OXFORD

**Green Councillor David Thomas
is campaigning to improve air
quality across the City.**

HOLD THE CITY TO ACCOUNT ON AIR POLLUTION - VOTE GREEN ON 3RD MAY

AIR POLLUTION IN OXFORD BREACHES EU LIMITS

It is estimated that **about 80 early deaths** are attributable to air pollution each year in Oxford.

GREENS SAY: LET OXFORD BREATHE!

Green Party
for the common good

The Greens first suggested the idea of a zero emission zone to protect public health. We will make sure that the Council follows through with its proposals to implement one. We will also:

- Expand the proposed zone to include the most polluted streets in East Oxford (e.g. St. Clement's)
- Explore innovative, low carbon, public transport (e.g. trams) and invest in making cycling safer

HOLD THE OTHER PARTIES TO ACCOUNT - VOTE GREEN ON 3RD MAY
