**THE GREENS VOTED TO SPEND THE MONEY ON REDUCING THE CITY'S CARBON FOOTPRINT
WHO DO YOU THINK CARES MORE ABOUT CLIMATE CHANGE? - VOTE GREEN ON 3RD MAY**

MAKE OXFORD A CITY FIT FOR THE FUTURE

Green Party
for the common good

Greens have a long track record of action on climate change and environmental protection in Oxford; e.g. enforcing greener building standards, investment in energy efficiency and renewables, divestment from fossil fuel companies, expanded doorstep recycling, improved street cleaning, campaigning for safer cycling and more electric vehicle charging points.

Recently, Greens opposed the Council's costly £4m plans to double the size of Seacourt Park and Ride - building on the flood plain - instead of putting the money into community facilities, measures to reduce the City's carbon footprint and better facilities for the homeless.
