

PARRAMATTA, GRANVILLE, HOME BUSH and STRATHFIELD

COST: \$16.8 BILLION

THOUSANDS MORE CARS DAILY

HUGE TOLLS FOR DECADES

STOP WESTCONNEX

WESTCONNEX IS NOT THE SOLUTION - IT WILL WASTE BILLIONS AND DESTROY OUR COMMUNITY

The Baird government's \$16.8 billion 33km toll road will:

- decimate local communities and fail to solve Sydney's traffic jams
- impose huge tolls on tollways which will be privatised
- destroy crucial green spaces and produce dangerous air pollution
- risk billions of dollars of our money on a project that is fatally flawed

Both Labor and Liberal parties support WestConnex

Malcolm Turnbull is silent on the excessive cost blow out of WestConnex and the lack of public transport options for this expenditure while the ALP, knowing the devastation it will have locally, is nevertheless supporting it at state and federal levels.

"The Greens have always opposed WestConnex.

We should be investing in world class public transport not dirty tollroads."

Jenny Leong, NSW Greens spokesperson on WestConnex.

In PARRAMATTA, GRANVILLE, HOMEBUSH and STRATHFIELD WestConnex will:

- Lock western suburbs residents into huge tolls of up to \$109 per week (from 2023) for decades and deny them fast, efficient public transport.
- Increase air pollution significantly and increase traffic congestion along Parramatta Rd and on local roads.
- Result in large unfiltered ventilation exhaust stacks located less than 500 metres from homes, public schools, childcare centres and sports fields on Concord Road, North Strathfield and Underwood Road with additional major infrastructure next to Arnott's Reserve.
- Acquire Bill Boyce Reserve in Homebush until 2019, the southern section of Arnott's Reserve and a section of Powell's Creek Reserve.
- Increase the risk of asbestos contamination from construction as the M4 Widening stage of WestConnex has disturbed large amounts of asbestos previously used as road fill.
- Cause unprecedented impacts during years of construction with thousands of extra truck movements 24/7 and high levels of dust, noise and vibration.

TAKE ACTION - STOP WESTCONNEX
