

CHEAP, CLEAN ENERGY FOR EVERYONE – OVERCOMING THE ROADBLOCKS

Matt Rose

Australian Conservation Foundation

Financial Advantage of Fossil Fuels

Australia

~**\$2.5bn** per year in fuel tax credits for mining companies

\$2.6bn per year in annual Australian health costs due to coal-fired power

\$1bn in potential concessional tax payer lending to Adani

No price on pollution

Mine rehabilitation is not adequately priced into projects across Australia

Queensland

\$500m annual Community Service Obligation to continue to subsidise centralised energy production

\$700m in annual 'industry assistance' to mining companies

\$100m in groundwater for proposed Galilee Basin coal projects

\$8.7bn in future rehabilitation costs of land disturbed by mining companies

Federal Government's Spending Priorities (Next 4 Years)

Political Environment

Coal Fired Power Stations

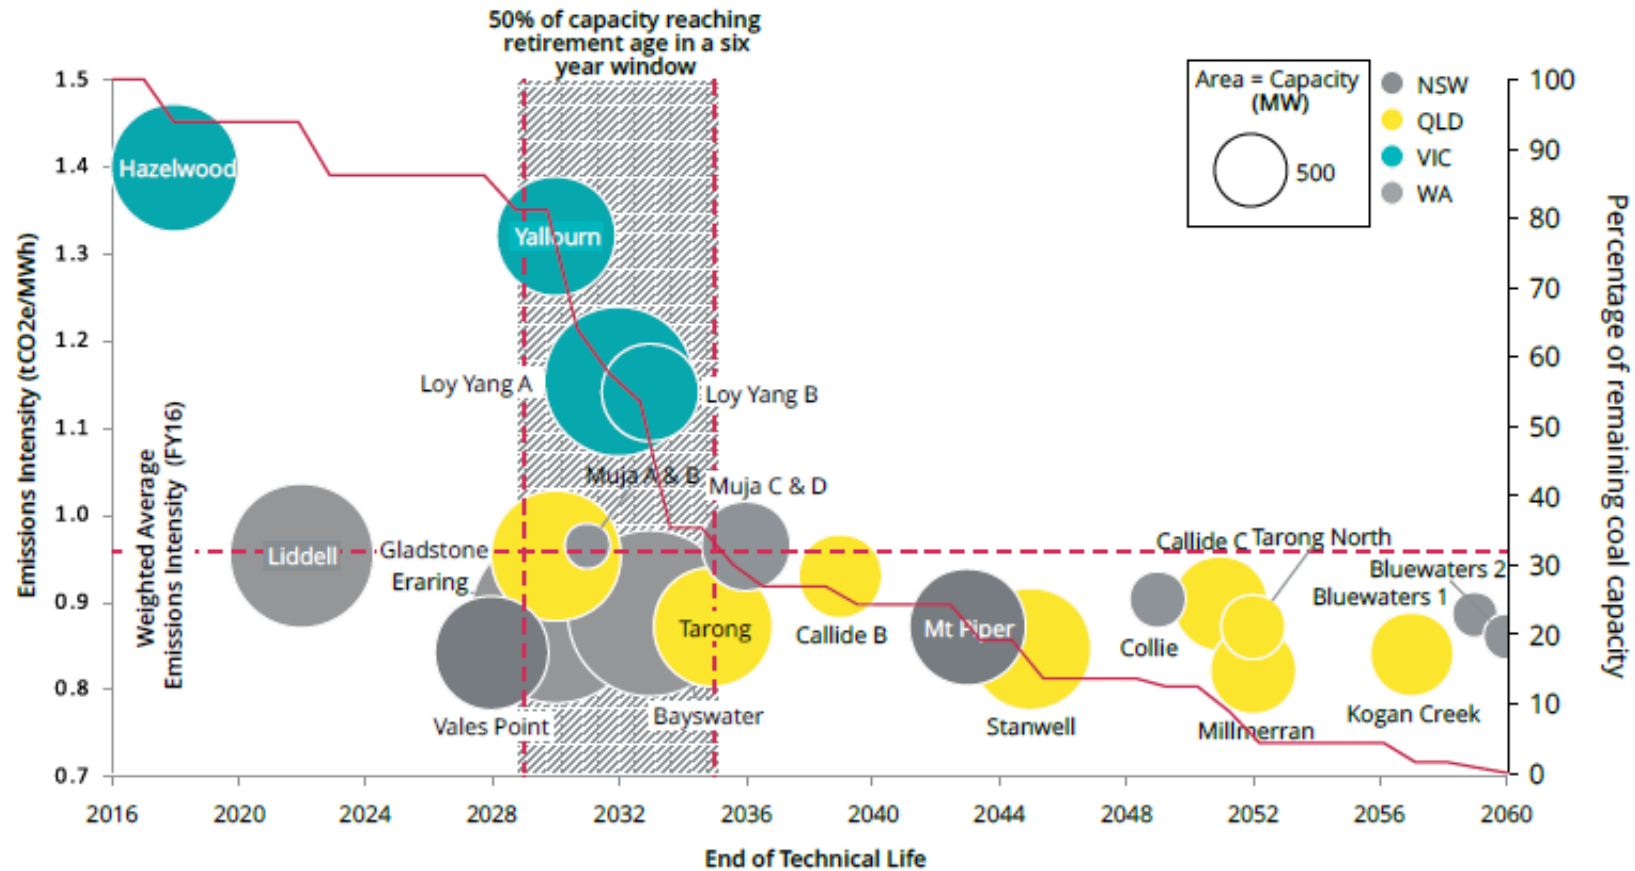

Figure 4 – Potential future coal-fired capacity losses, based on coal generator age (Australian Energy Market Operator, 2017; EY analysis)
