

Timber steps and pcc slabs removed. New retaining wall to support shrub bed by the neighbours. New dwarf wall along Argyle Place. Seating area formed 3 x 3m approx

New 1m high railings along Argyle Place, with concrete capping on top of low wall

Min 1.5m wide ramp down to seats Bench re-located

Existing gate retained Entrance area raised by about 30cm along downhill edge.

Existing bin retained - temporarily remove, form new concrete base.

Form new concrete base for seat. Seat from bottom of park bolted to base

Concrete seating steps 300 high and sloping side wall

Basket sing installed on level platform formed roughly where existing bars are. Rubber crumb surfacing over 150mm depth type 1 over terram, with pcc edges

Steel bars PCC edge around mulch for support

3m high welded mesh fence, dark green colour.

Area under trees kept as existing (soil, leaf litter, patchy grass)

No pcc edge to Tiger Mulch due to slope and tree roots.

Existing self-closing gate & fences kept along Eastern boundary

New Tiger mulch surfacing under existing unit, depth to suit fall height of 1.8m. No pcc edging on slopes or around trees

Open grass kept through centre of playground Re-grading required from top to bottom of grass slope

F	Rubber crumb surfacing under swing & bars	23.2.17 af
E	Seat at top relocated to avoid bin. Extent of Tiger mulch clarified (no change to area)	7.2.17 af
D	Steps altered to shift focus away from swing & be more economical to build; barrier at top of slope omitted; pcc edge to Tiger Mulch on slopes omitted.	25.1.17 af
C	PCC edging added to Tiger mulch; boat swing changed to basket swing extended.	4.1.17 af
B	Tiger mulch extended; steps added; woodland trail omitted	5.12.16 af
A	works to kick about area omitted due to cost but with possible solution shown for information only Carpet slope instead of steps	9.9.16 af
