

Health Care for All - WA 2020 Strategic Plan

Our MISSION:

The mission of Health Care for All - Washington (HCFA-WA) is to work for high quality, sustainable, affordable, publicly-funded health care for all Washington residents.

Our GOAL:

To pass a bill in 2020 that includes one or more key elements of the Washington Health Security Trust (WHST) bill and lays the foundation to pass a revised WHST bill with a detailed financing system.

STRATEGIES:

- A. Monitor and participate in the Pathway to Universal Health Care Work Group with the aim of guiding the work group to support single-payer, universal health care legislation such as the WHST.**
- B. Draft a bill for 2020 to create a single-payer system to regulate the cost of pharmaceuticals in Washington state, in consultation with legislators, legislative staff and other experts as needed.**
- C. Meet with legislators and stakeholders as we work to integrate key elements of the Washington Health Security Trust into current legislation and get commitments of support for such legislation.**
- D. Advocate for the State Based Universal Health Care Act (SBUHC Act) which will provide the Federal support necessary to enable a state-based universal health care system in Washington.**
- E. Increase the number of HCFA-WA supporters & members as we build a statewide network.**
- F. Raise necessary funds to support our advocacy of, and lobbying for universal health care bills.**
- G. Work with the grassroots, coalition partners, and key stakeholders, to build momentum and statewide support for our work.**
