Some things you might say:

There's no safe way to kill people or to help them suicide.

Tell the truth! It's about assisted suicide and euthanasia NOT assisted dying!

Vulnerable people will be put at risk by this law.

Sick people who want to live will have to justify why they *want* to be a burden!

Don't turn doctors into suicide helpers!

This is a recipe for Elder Abuse

No law could stop someone deciding for euthanasia or assisted suicide because they felt they were a burden!

The Bill turns doctors into liars in filling out the death certificate

NO doctor can accurately predict when a person will likely die, certainly not 12 months or more! People may be throwing their lives away!
