Motion to approve funding of up to \$2,700 for MapBox developer to add an interactive map to our website

Agenda Item: XIV

Date: June 12, 2017

Proposed By: Aaron Downes

Background

Currently we have a static image of our NC boundaries and 7 neighborhood zones on the front of our website. If a prospective volunteer wanted to know if they lived in our NC, they would have to use another map application.

If approved, this motion will add a mobile-friendly, interactive map to our website that will allow users to find quickly their location. They can also find which zone they belong to. The development of this app will also include documentation, so we may build more functionality into the map data in the future.

There will also be selectable map layers showing the reach of different city services including:

- LAPD Car coverage
- LAFD Stations
- Bordering neighborhood councils
- LA County Districts
- State Senate Districts
- State Assembly Districts
- US Representative districts

CITY OF LOS ANGELES

Considerations

Arguments against:	Counter Argument:
Doesn't this require a contract?	No, as this is not a request for full website design, simply the development of a specific application. We have approved a similar request when we paid for a Nationbuilder consultant to help re-design our 'Agendas' page
This is a waste of taxpayer's money. People can just find out from DONE or by calling us if they are in our NC or not	Every so often, I get calls directed to my cell phone from people frustrated with the lack of help provided by the city and our website. Helping them over the phone is always a challenge, and a waste of valuable time. This app will be a very valuable self-service tool, and will even aid our board members to serve the community more efficiently
I'm having trouble visualizing exactly what this is or what it will look like.	This interactive map is modeled after SORO NCs map, which you can preview here: http://www.soronc.org/about/boundaries
