Passing

David P. Close, Esq. 1915–2004
Founding Board Member, Legal Counsel, and Counsel of Counsel died on July 4th, 2004 at the age of 89 at his home in Amstelveen, Virginia. The passing of this dedicated and generous member of the IIF family was noted in the 2004 Annual Report and he is dearly missed.

Robert Roy White, PhD
Dr. White died on January 22, 2006 at the age of 89. He enjoyed a long and distinguished career as a chemical engineer, university professor, consulting engineer and researcher. Dr. White held numerous patents in engineering, published articles on a wide variety of subjects, and was involved with the Manhattan Project for the development of atomic energy. We are grateful for Dr. White’s many years of dedication and support of the International Eye Foundation.

Message from the President and Executive Director

"IIF is leading the way in sustainability of eye care programming" noted Dr. R. Parajasegaram of the World Health Organization’s Programme for Prevention of Blindness in 2005. Certainly encouraging coming from one of our community's most experienced and distinguished mentors. Dr. Para had the opportunity to visit both the Malawi government eye units which previously had no earned revenue or optical services, and a private ophthalmology practice in Guatemala that previously treated only private, paying patients. He observed the results in these very different institutions which were IIF's first sustainability partners.

Indeed, we began focusing on a systems approach to sustainability seven years ago recognizing that the growing demands for eye care cannot be met with limited government and donor funds, and without significant improvements in efficiency and productivity of existing services. IIF’s SightReach Management program builds on this model of practice planning to help organizations create a hybrid social-entrepreneurial approach to organizational sustainability with the focus on quality and patient-centered services. After all, it’s about serving the patient and making them as comfortable as possible during their experience at the hospital.

Two private foundations have made it possible for us to take on five new hospital partners and the interest in our work continues to grow. We know however that with every new partner, there are new challenges. The model is not a template, but an adaptation with each hospital collaboration. We are building our expertise and capacity, and have a true passion for this approach because of the impact not only on eye care providers, but in the satisfaction of patients for whom we are forwarding our mission.

We continue to work on child survival to save the sight and lives of women and children challenged by poverty, disease and violence. And to control "river blindness" thanks to the miracle drug Meccizan®.

IIF’s SightReach Surgical program grows exponentially providing services to eye care providers worldwide who need quality ophthalmic products.

Thank you all for your support and partnership as we continue to break new ground in transforming how eye care is delivered in the developing world.
Our Mission

The International Eye Foundation is dedicated to "helping people see!" Since our founding in 1961 by corneal transplant pioneer Dr. John Harry King, Jr., IEF has evolved to meet the ever-changing challenges and opportunities faced by people at risk of blindness around the world.

1960's: IEF sends individual ophthalmologists and teams to provide eye care and training worldwide.

1970's: Establishes training programs in developing countries to increase the number of eye health workers needed to address the high rates of avoidable blindness. IEF continues Dr. King's passion by helping to establish eye banks around the world.

1980's: Helps expand national eye care services within countries, gains "official relations" status with the World Health Organization in 1985, and establishes disease-oriented programs to fight trachoma, onchocerciasis, and vitamin A deficiency.

1990's: Opens program in newly independent Eastern Europe, and establishes SightReach® Management to focus on sustainability of eye hospitals. SightReach Surgical® is established offering new, quality ophthalmic products to eye care providers worldwide. As a member of the International Agency for the Prevention of Blindness, IEF supports the "VISION2020: The Right to Sight" Campaign.

2000: The new millennium sees expansion of our successes and collaboration with WHO and IAPB's VISION2020 program to eliminate avoidable blindness by the year 2020.

Childhood Blindness

Child Survival—prevention of vitamin A deficiency

IEF's USAID-funded child survival project in Nsanje District, Malawi is one of the first in the country to reach the 80% target established by the World Health Organization and the Ministry of Health for training health workers in the Integrated Management of Childhood Illness protocols. IMCI has been successfully introduced to over 450 communities by training all 184 community health workers and 6,384 community members in the 17 priority behaviors and actions. The increased knowledge, skill, and organization have led to increased vitamin A coverage (from 49% to over 85% of eligible children 6-59 months of age), and measles immunization coverage (from 64% to 91%).

Health centers now work with 150 communities distributing thousands of insecticide treated bed nets to mothers with children to prevent malaria. More than half of all households in the district report having at least one treated bed net in their house. Nearly all (97%) mothers attending antenatal clinics report receiving malaria tablets for prevention at least once during pregnancy.

Retinopathy of Prematurity (ROP)

Modern medicine is saving more premature infants who are at risk of ROP and a life of blindness when born early or low birth weight. With IEF support, Aravind’s Eye Hospital at Coimbatore has a sophisticated retinal fundus camera allowing the surgeon to examine the back of the infant’s tiny eyes and treat as needed. In 2005, 473 babies were screened, 42 identified with ROP, and 23 treated with laser, cryo-therapy, or surgery.

Medical and Surgical Treatment of Child Eye Diseases

Our hospital partners are better able to care for children with congenital cataract, eye infections, eye injuries, and ROP thanks to IEF support, and report that sight-saving operations on children increased from 704 in 2001 to 1009 in 2004.
SightReach® Prevention

Onchocerciasis—prevention of "river blindness"

IEF was the first US-based organization to establish community-based ivermectin (Mectizan®) distribution programs in Africa and Latin America in 1989. Merck and Company's generous donation of the drug makes it possible to treat those infected and prevent the disease from leading to blindness. Together with the National Onchocerciasis Programs, all of the target population in Malawi's southern region and Cameroon’s Adamawa Province receive their annual dose of Mectizan. This year, at the invitation of the government of Cameroon, IEF expanded distribution in South Province. With support from the African Programme for Onchocerciasis Control and the Insect Foundation, over 2 million people were treated in both countries in 2005.

Trachoma

This ancient and highly communicable eye disease starts with an infection under the eyelids which eventually leads to scarring and contraction turning the eyelids inward causing the eyelashes to scratch the cornea, the clear front window of the eye. This leads to ulceration of the cornea and blindness. Flies carry the infection from one person's eyes to another. Lack of water and poor hygiene exacerbate eye infections, especially trachoma. Medical treatment and surgery for scarring eyelids are a blessing for those who suffer. But the key to eliminating trachoma is prevention, and the key to prevention is water. Water keeps faces clean and improves hygiene. IEF's partner hospitals continue to treat patients with trachoma and promote prevention and water development. In southern Malawi for example, active trachoma infection has been reduced by over 50% and the complications leading to scarring and blindness have been reduced by 80%.

SightReach® Management

IEF invests its donor dollars and technical assistance in a systems approach to sustainability which is changing how eye care services are delivered. Both government and private eye hospitals adopt a patient-centered philosophy treating paying and subsidized/free patients with the same quality care, and achieve financial sustainability. From 1999 through 2004, USAID supported IEF's work with seven (7) hospitals in six countries.

These aggregate data of all 7 hospitals show an increase in outpatient exams of almost 43%. All eye surgery increased by 32% and cataract surgery by 45%. Operations for children increased from 704 in 2001 to 1,009 in 2004. While earned income increased from 2001 to 2004 by 90%, the number of poor patients who were subsidized by revenue or treated free of charge increased from 45% to 64%. All 7 hospitals have improved clinical services, service delivery, procurement practices, information and reporting practices, and have established or reorganized outreach campaigns. Five of the 7 report on the quality of surgical outcomes, and 4 of 7 have established or reorganized optical services.

SightReach® Management

IEF’s approach is highlighted in two completely different settings. These data show results from a system's approach adapted by the Lions SightFirst Eye Hospital in Lilongwe, Malawi, a government hospital which had no amenities for private patients and no mechanism to earn income. The second is Visualiza in Guatemala, a private practice that previously saw private patients only and had no mechanism to treat poor patients. IEF’s intervention and investments focus on quality, management and sustainability transforming both eye services into social enterprises treating both private patients and the poor. Emphasis is on quality, patient satisfaction, productivity, efficiency, and financial sustainability.

Lions SightFirst Eye Hospital (government), Lilongwe, Malawi, Africa

From 2000 to 2004, OPD exams increased 21.09% from 19,815 in 2000 to 23,994, the number of patients receiving an intraocular lens increased from 20% to 96% significantly increasing the quality of visual outcome and patient satisfaction, and the number of cataract operations per surgeon increased from 405 to 696 because of increased efficiencies.

The new cafeteria and optical service established within the eye unit produce most of the revenue which increased from zero in 2000 to 23% in 2004. Importantly, 96% of all patients are still treated free of charge.

Visualiza (private)
Guatemala City, Guatemala

From 2003 to 2004, OPD exams increased 61% from 6,312 to 10,173, all eye surgeries increased 172%, and cataract surgeries increased 239% from 255 to 865. Guatemala has 150 ophthalmologists and Drs. Mariano and Nicolás Yeé alone perform nearly 10% of all cataract surgery in the country because of increased productivity and efficiency.

Revenue increased 104% from US$168,316 in 2001 to US$342,835 in 2004. The business plan requires that 80% of profit be reinvested to expand services. An important outcome is that Visualiza can now afford to hire a qualified pediatric ophthalmologist full-time. Children with congenital cataract and glaucoma, squint, retinopathy of prematurity, eye cancers, and difficult refractive errors can now be seen at Visualiza instead of being referred elsewhere.

Another important outcome is that free and subsidised patients increased from zero in 2002 to 83% in 2004 achieving an original goal of incorporating treatment for the poor within their practice.

SightReach Surgical®

The SightReach Surgical® Mission

SightReach Surgical® (SRS) is a social enterprise of the International Eye Foundation dedicated to reducing the cost of ophthalmic products in developing countries. Access to quality ophthalmic supplies, instruments, and equipment at affordable prices is reducing costs for eye care providers and hospitals in the developing world.

Values

- SightReach Surgical® strives to reduce the cost of materials and expand services to reach more and more people in need, and provide a quality option to ophthalmic care providers whose product choices and pricing have been thus far limited.
- SightReach Surgical® only offers products that have FDA or CE marks and that are utilized as part of accepted medical and ophthalmic practice.
- SightReach Surgical® is committed to developing strong and supportive partnerships with its manufacturers, distributors and customers with honesty and good faith at the core of all dealings.

Events

Eye Ball®

Masai warrior and school teacher Joseph Lemosali Lekuton spoke inspiringly of his native Kenya, the hardships faced by blind people, and the importance of support given that night. Ball Chair Nancyfaye Autenzo and Co-chairs Cyd Everett and Julia Hopping ensured a fun and successful evening at the prestigious Four Seasons Hotel in Georgetown. IEF’s “Promotion of Peace and Vision” awards were presented to William D. and Suzanne King Clark for their decades of service. Dr. John F. O’Neill was honored with the ophthalmologist award for his service to IEF and his strong commitment to prevention of blindness worldwide. We are grateful to the following sponsors: Hogan & Hartson, ENC Marketing & Communications, SAKS Fifth Avenue, Pearson’s Wine & Liquor’s, Ingenuity Technologies, Christopher Consultants, Parkway Cleaners, Mr. and Mrs. John Duke Anthony, BACA, RDI, Pitzer Ophthalmics, The Willard Hotel, The Jefferson Hotel, and The Latham Hotel. And to Helen Clark Atkerson for sponsoring the annual awards.

“Salsa for Sight” on World Sight Day

Spring Fashion Show

A sunny Spring day with a fabulous lunch and shopping all for a good cause! IEF Board member Ambassador Guillermo Castillo and his wife Flor (right), hosted IEF’s first luncheon and fashion show on April 26th, 2005 at their residence. Marsha Nelms of Marsha B. Nelms, Ltd. offered a fun collection ranging from casual dailywear to formal evening—all for sale after.

Wine Tasting—Denver

The first Denver Wine Tasting was hosted by IEF Board member Helen Clark Atkerson, May 22nd, 2005 in her home. Over 60 people enjoyed an afternoon of good wine, hors d’oeuvres, and company. We’re grateful to Mondo Vino, Girard Winery, Arrowood, and Applejack Liquors for their support. Cheers to Helen, her committee members Louise Hurlbut and Nora Feeley, and their great success on behalf of IEF.

Society of Eye Surgeons

Dr. Hannah Faal, Immediate Past President of the International Agency for the Prevention of Blindness, provided an update on “VISION2020: The Right to Sight” at the annual IEF Society of Eye Surgeons breakfast meeting in October 2004 during the American Academy of Ophthalmology (AAO) meeting in New Orleans. Dr. Faal was the 2004 recipient of the AAO’s “International Blindness Prevention Award.” Following her remarks, the World Health Organization’s Dr. Ivo Kocar presented a stimulating “Update on Blindness Prevalence Data Worldwide”, a preview of WHO’s soon-to-be-released data in December 2004. The annual breakfast meeting is an opportunity for IEF volunteers, friends, supporters and colleagues to come together and strengthen collaboration around the world.

With Gratitude

The International Eye Foundation is grateful to all the caring people whose generosity offers the gift of sight. Our support comes from many sources — pennies collected by school children learning to care about others, contributions of cash and other financial instruments, in-kind donations from ophthalmologists and corporations, collections taken up by caring optical companies, bequests to leave a lasting legacy, and gifts to honor a person or significant life event. For all of these blessings, we thank you on behalf of the countless people who benefit from your generosity.

We wish to recognize the donors from July 1, 2004 to June 30, 2005. We make every effort to ensure the accuracy of this listing. If an error has been made, or if a donor wishes to remain anonymous, please contact the IEF so that a proper listing may be made. Thank you.

Contributors to the IEF’s ‘Annual Fund’ campaign are marked with an (*).

John Harry King Platinum Donors: Honoring the founder of the International Eye Foundation, recognize gifts to the IEF from $5,000 to $9,999.

Global Impact

The IEF is a member (#0318) Global Impact (formerly International Service Agencies), a federation of premier international organizations. Global Impact conducts workplace giving campaigns in corporations and with local, state, national and overseas-based government employees. We wish to thank these employees for their generosity and compassion. In addition, we thank the agencies, businesses, and those at Global Impact who helped make these gifts possible. Please note #0318 in your United Way or Combined Federal Campaign.

The International Eye Foundation is diligent in its stewardship of the financial resources that are entrusted to us by all our donors, large and small. We are proud of the prudent use of these funds in providing effective and high quality eye care services.

IEF's support for the development of the VISION 2020 e-resource is but one example of a wise investment that produces a most productive return.

Site News
monthly newsletter of vision 2020 e-resources

The Vision 2020 e-resource website was established two years ago initially with an IEF grant. It has grown enormously in the field of building eye care management capacity globally through providing a variety of eye care management tools, information, and techniques. Currently reaching an audience in over 125 countries, the website contains over 450 e-products in addition to weblinks related to eye care and has over 75,000 hits per month. The eye care calendar captures eye care events happening throughout the world. Site news, a monthly e-newsletter; highlights different themes in each issue and reaches over 5000 users. The website can be accessed at www.v2020eresource.org.

Feedback from a reader:
“Enjoyed the Jan 2005 Site news. Many thanks for making this extremely useful site in the public domain.”
R. Parajasisaram, Past President - International Agency for Prevention of Blindness
