

Welcome to **the ICN HUB** - a secure, online space for ImproveCareNow members to connect across the miles with care teams, colleagues, patients, parents & collaborators. The HUB is a powerful platform for *sharing seamlessly & stealing shamelessly* - designed to promote continuous improvement, innovation, research and engagement efforts that will transform care, health and costs for all young people with IBD.

Hi everyone using this new collaboration platform! We need YOU to help us name what we will call this platform when we share more widely with the community! We'll share the top names and the ICN community will vote on their favorite. Comment and share your ideas below, or email info@improvecarenow.org. We are hoping to have a few ideas by July 17, 2020. Thank you!

Sarah Nocito created this document. Mary opened the document from her account and started editing it simultaneously. They were on a zoom meeting and could watch their changes being made in real-time 🙌

Our purpose is to **transform the health, care and costs for all children and adolescents with Crohn's disease and ulcerative colitis** (Inflammatory Bowel Disease or IBD) by building a sustainable collaborative chronic care network. We are enabling patients, families, clinicians and researchers to work together in a learning health care system to accelerate innovation, discovery and the application of new knowledge.

GROUP WORK

Actively collaborate with each other through private and public groups

COVID-19 Response
