Word of Welcome

Dear Colleagues & Friends,

Welcome to the 4th annual meeting of Excellence in Paediatrics (EiP). As board chair, I have had the privilege of working with a distinguished steering committee to put together this year’s programme. As always, EiP aims to convene outstanding scientists and speakers and frontline paediatric clinicians of all backgrounds. The mission of EiP is to improve child health and healthcare globally. This conference is our signature event in pursuit of that mission. Over the next 3 days, delegates from over 80 countries around the world will acquire new knowledge and skills from international experts and they will engage each other as part of our growing community. Both of these activities will serve the children they care for, but we pursue our mission in other ways as well. This year, EiP has some exciting new and ongoing initiatives that I would like to share with you.

Our Bursary Programme. Each year, EiP commits to bringing scientists and clinicians from the developing world both to our congress and to a special pre-congress workshop where they have the opportunity to learn from our distinguished faculty. Last year we focused on neonatal resuscitation. This year, Drs Fred Connell and Kenny Sherr are leading an all day seminar on promoting public health. Fifteen finalists were selected from over 70 applicants. They have brought specific projects with them and will work on how to best refine them and implement them in their home countries. EiP is committed to continuing to fund and to grow this important programme in the coming years.

Our Initiatives. With the support of unrestricted educational grants, EiP is launching 3 initiatives at this year’s meeting. The Global Breastfeeding Initiative aims to improve breastfeeding rates in 9 target countries. The European HPV Vaccination Initiative aims to improve vaccination rates in 4 European countries. And the Anaphylaxis Awareness Initiative aims to improve anaphylaxis awareness and ultimately preparedness in 6 target countries. Next year, we will be launching the Promoting Active Healthy Lifestyles Initiative. Each of these important initiatives have assembled delegations from the target countries.
But to succeed, they will need your help. If you are interested in learning more and participating in any of these initiatives, please visit the EiP Community website to find out how to get involved - www.excellence-in-paediatrics.org or come and learn more at the EiP Community stand in the exhibition hall.

The Excellence in Paediatrics Community (EiPC). The EiP community is open to individual professionals from all over the world to become members. Hundreds of the conference participants, along with professionals who have registered for the Breastfeeding Special Interest Group, have been registered to become members and contribute to the Community’s mission and activities.

Excellence in Paediatrics is launching a web platform that will allow members to collaborate, exchange knowledge, and share experiences and practices. The members’ profiles will be available openly through the Community website and EIP members will have the opportunity to present and share their activities and achievements with all community members. Forums, discussions and libraries are available for all members to share their knowledge and ideas. Calls for collaboration on scientific tasks, projects and research are published through the platform on a regular basis from members to other members.

So visit the EIP members’ section in our website, sign-up for free, and become a member of a vibrant Paediatric Community. We will also be demonstrating the website in the community’s booth in the exhibition hall.

As always, EiP focuses on continuous process improvement. We need your feedback to continue our pursuit of excellence. Please fill out your evaluations and feel free to pull me, or any member of our board, aside and offer in person suggestions if you wish.

I look forward to welcoming all of you in person to the wonderful city of Madrid.

Best wishes,

Dimitri A. Christakis, MD, MPH

The International Paediatric Community

Promoting and sustaining excellence in paediatric health and health care globally

Excellence in Paediatrics is an international Paediatric Community that operates on a non-profit basis to facilitate the refinement of raw scientific information into best clinical practice for child health professionals. These professionals include both general practitioners, and community- or hospital-based paediatricians. EiP was developed exclusively to provide continuous medical education of unparalleled quality in unique support of the daily clinical practice of paediatric health care professionals. Our approach to do this is effective because it is direct: We notify end users directly via our global network. Leading clinical experts translate emerging academic research effectively into instantly deployable clinical skills. These high-quality translations are effectively made available for our global members through direct communication so they can quickly understand the news, adapt their practices, and improve patient care standards. Direct communication to frontline physicians is effective. It means real change. To find out more and join us in our mission, please visit our website: www.excellence-in-paediatrics.org
