Brian Kennedy: Portfolio Manager
 Industry start: 2009
 BA, MSc, CFA

Investment Strategy

- The Davy ESG Equity strategy invests in high QUALITY³ companies with stronger Environmental, Social and Governance (ESG) performance relative to peers, using a blend of quantitative and fundamental investment approaches. We call this approach 'Quantamental' investing.
- We believe ESG risks represent long-term material business risks and seek to invest in companies with strong ESG characteristics. ESG data provides a vital source of non-financial information which drives improved investment decision making.
- In our opinion, stocks which exhibit the characteristic of QUALITY will deliver consistent superior risk adjusted performance over the long term. The Strategy focuses on companies which offer a combination of high QUALITY and strong ESG performance to build a high conviction portfolio from the bottom up.

Investment Process

- ESG is integrated across the investment process, including; idea generation, fundamental research, valuation, engagement, portfolio construction, risk management and reporting. Certain controversial business areas are also excluded from the investable universe.
- ESG research is used as part of a fundamental research process to identify and evaluate key sources of business risk. The strategy leverages a proprietary valuation method which rewards companies who effectively manage their ESG risks.
- The strategy considers ESG performance and ESG momentum in the portfolio construction, with companies with higher and improving ESG ratings having larger weightings in the portfolio.
- Company engagement is used to support fundamental research and drive improved performance on key ESG issues. All engagements are investor-led.

Performance

Returns (%) as at March 31st, 2020

Equity Strategies - USD	3M	YTD	1Yrs	3Yrs	5Yrs	7Yrs	10Yrs	Since Inception (May 2011)	Inception Date
