Investment Strategy

- The Davy Smaller Companies Equity Strategy, invests in high QUALITY³ smaller companies with market capitalizations between \$200 million to \$15 billion, using a blend of quantitative and fundamental investment approaches. We call this approach 'Quantamental' investing.
- The strategy aims to capture the beneficial characteristics of smaller companies who tend to be innovative and entrepreneurial, have the potential to grow faster than the broader market and are often overlooked because of their size. This results in a high conviction portfolio of 40+ stocks, which are typically high Growth and high QUALITY.
- Integrating Environmental, Social and Governance (ESG) risks is a powerful complement to the Firm's investment philosophy of QUALITY, helping to identify sustainable smaller companies by marrying leading fundamental characteristics with better long-term business risk management.

Investment Process

- The strategy follows a firmwide Quantamental investment process. Our proprietary model allows companies to be easily compared to each other, using our definition of QUALITY. This is central to the origination and authentication of all investment ideas.
- The strategy focuses on the highest QUALITY names in the investment universe, Ideas which meet the requisite QUALITY and Growth characteristics are subject to detailed bottom-up fundamental analysis.
- QUALITY and ESG criteria are fully integrated within the investment process including idea generation, fundamental research, stock valuation, risk management and engagement.
- Company engagement is used to support fundamental research and drive improved performance on key ESG issues. All engagements are investor-led.

Performance
