

Attract Birds and Butterflies, Improve Water Quality, and Prepare for Climate Change

Sacred Grounds

WORKSHOP

How to Green Your Congregation's Grounds

Answer the faith-based call to environmental stewardship just in time for Earth Day!

Please join us for an afternoon workshop where you can learn how you can beautify your congregation's grounds and reduce its environmental footprint by creating wildlife habitat and rain gardens. You will learn about the National Wildlife Federation's **Sacred Grounds Program**, which is an innovative program that recognizes and certifies congregations that have made their grounds friendly to wildlife. You will also learn about the Montgomery County RainScapes Rewards program that offers rebates for habitat projects that reduce stormwater runoff.

Sunday, April 19th, 2:00pm – 5:00pm EST

Adat Shalom, 7727 Persimmon Tree Lane,
Bethesda, Montgomery County, MD

Please RSVP to Elizabeth Stevens at elizabeth@gwipl.org.
