
Tree Planting Opportunities

for Congregations in Howard County

Want to plant trees at your congregation to help restore the Chesapeake Bay Watershed while learning to care for Creation?

Participating Congregations will receive (for FREE):

- Native trees and all the tools and equipment for planting them.
- Technical planning and support to choose the right trees and place them properly.
- A training workshop for Congregational "Green Leaders" covering the spiritual foundation of earth stewardship, the environmental benefit of trees, and how to plant and maintain them.
- Leaders will then return to their congregation to deliver the same workshop to reach 20+ congregation or community members who will help to plant the trees on-site.

A Perfect Community-Building Activity

Looking for congregations with space to plant about 10 trees.

Reserve your workshop spot today to be included! This program is available for 5 congregations.
