

# JAIN ELEMENTARY SCHOOL | SYLLABUS

“We believe every childhood should involve the exploration of nature. Our programs share our love and curiosity for the environment with young people who will one day change the world.”

- THE GREEN EXPLORERS CLUB

## About Us

Green Explorers Club is owned by two moms who are passionate about preparing our kids for a changing planet. We empower our own kids, and kids all over Chicago, to help preserve our environment, protect the planet, and understand how they can make a difference.

Each week your child will explore sustainability through hands-on activities that demonstrate the importance of taking care of our planet. Each of our classes is tailored to create a growing curiosity about the environment in our kids so as they grow into future engineers, artists, doctors, farmers, clothing designers, presidents, or whatever they want to be... they will have the basic tools they need to incorporate sustainability practices into their initiatives.

## Topics This Term

SCHOOL GARDEN HAVEST

AMAZON RAINFOREST
