

STOP THE WESTERN HARBOUR TUNNEL

To the Honourable Speaker and Members of the Legislative Assembly in NSW, the petition of the people of New South Wales brings to the attention of the House:

The government is proposing to turn White Bay into a huge construction site for the Western Harbour Tunnel with massive impacts on local residents. White Bay will be used for:

- **A casting plant to fabricate the large concrete sections used in the undersea tunnels; and**
- **A dumping ground for toxic sediment to be dredged from the harbour**

The undersigned petitioners therefore ask the Legislative Assembly to call on the Government to reconsider their plans to turn White Bay into a construction site and dumping ground. Our community does not want a massive waste dump and construction site at White Bay. The noise, vibration and contamination are set to have a massive negative impact on our local area and quality of life.
