

Reject The Lesser Evil. Fight For The Greater Good!

People across America are standing up against a failed and broken system. And we can give them a political home. A movement to get the big money out of politics, and put the people back in. A movement for real democracy and real solutions.

An incredible 58% of Americans want a new major party. A strong Green campaign will give voice to this rising majority and empower a new generation that knows there's no future in politics-as-usual.

The power to create this world is not in our hopes. It's not in our dreams. It's in our hands!
