

# Petition for a Community Friendly Use of the Malden Hospital Site

We community members, whose signatures appear below, petition the elected leaders of Malden and Medford, Massachusetts, the Massachusetts state house, and Washington D.C. to help develop and fund an open space plan for the 18 acres of Fellsmere Heights which will enrich the quality of life for the people of Malden, Medford, and beyond.

Please join us in rejecting the current proposed high density housing development in favor of a mixed use plan that meets the needs of the communities with recreational facilities, open green space, community building resources, and a small amount of moderate income elderly housing to make Fellsmere Heights a source of relaxation and well-being for the people of both cities and visitors alike.
