

*Responsible Policy. Real Prosperity.*

March 20, 2017

Heidi Holliday, Executive Director  
Kansas Center for Economic Growth  
Testimony in Support of House Bill 2064  
Senate Public Health and Welfare Committee

Chair Schmidt and Members of the Committee:

Thank you for the opportunity to submit testimony in support of KanCare expansion from the Kansas Center for Economic Growth (KCEG). KCEG is a nonpartisan organization dedicated to promoting balanced budget and tax policies that help ensure all Kansans prosper.

Expansion of KanCare makes economic sense for Kansas. More than 150,000 working Kansans are now stuck in the “coverage gap.”<sup>1</sup> They make too much money to qualify for Medicaid but not enough to qualify for tax credits to help purchase health insurance on healthcare.gov. Expanding KanCare is a pro-growth policy for Kansas, and we can’t afford to wait any longer.

KanCare expansion benefits hardworking Kansans, local communities, and our state economy. It helps to create jobs in Kansas and allows the state to invest in the Kansas workforce.

- 1. KanCare expansion is good for hardworking Kansas families.** Many Kansans who work in child care, retail sales, nursing, construction, and food service have no health insurance. If Kansas expands KanCare, these hardworking families would qualify for health coverage. Kansans in all parts of the state will benefit, with the biggest gains in rural Western Kansas.
- 2. Expanding KanCare creates needed jobs in Kansas.** Kansas’ private sector job growth is lagging behind our neighbors. Conservative estimates are that KanCare expansion would bring 3,500-4,000 new jobs to the state of Kansas.<sup>2</sup> Additionally, expanding KanCare would help the nearly one-third of rural

hospitals in our state at risk of closing.<sup>3</sup> Expanding KanCare makes sense for the Kansas economy.

- 3. KanCare expansion makes good budget sense.** Currently, many uninsured Kansans use the emergency room for basic health care, and the costs are passed on to Kansas taxpayers. Expanding KanCare relieves this financial strain on hospitals. The state's financial obligation is no more than 10% of the cost of expansion, with the federal government picking up the rest of the bill. Kansas has forfeited over \$1.6 billion in federal funds since January 1, 2014, by not expanding sooner.<sup>4</sup> Expanding KanCare brings federal dollars to Kansas at a time when we need it most. In our neighboring state of Arkansas, expanding Medicaid had a dramatic impact. Uninsurance rates fell by half and the state saved more than \$100 million in FY 2017.<sup>5</sup>

In short, the Kansas Center for Economic Growth supports the expansion of KanCare through House Bill 2064 because it makes good economic sense for Kansas. We urge you to support the expansion of KanCare, and we are happy to answer any questions you may have via email at [info@realprosperityks.com](mailto:info@realprosperityks.com).
