

Dr Beccy Cooper - standing up for everyone in Worthing West - the young, working families, and older people

“I believe that everyone in the community should have their voice heard.

You deserve an active, local MP who will listen to you and fight for what you want”

I'm voting

Beccy Cooper

Labour

**Vote Beccy Cooper for
Worthing West on June 8**

Our pledges to young people

- Scrap university tuition fees and bring back student grants and the Education Maintenance Allowance
- A real living wage of £10 an hour
- Ban zero-hour contracts and unpaid internships
- Bring back housing benefit for the under 21s
- Lower the voting age to 16

"Young people, including those heading for university this autumn, should not be burdened by an average debt of £45,000 when they leave. Our plan for a free National Education Service will transform the way young people - and adult learners - become qualified to take on the jobs our changing economy will demand."

Our pledges to older people

- Secure pensioner incomes with the Triple-Lock on state pensions
- Protect the Winter Fuel Allowance and free bus passes for pensioners
- A fully funded Social Care Service to give security when it's needed
- No rise in the state pension age beyond 66
- Justice for women born in the 1950s hit by the five year rise in pension age

"Social care is an essential part of our care package. It ensures that, as we get older, we can have healthy and fulfilled lives. When we need care, it must be high quality and properly funded. But it should not cost anyone their home."

Our pledges to working families

- No increase in VAT and National Insurance, or on income tax for all but the richest 5% of high earners
- Build over a million new homes, at least half for social rent
- Move towards universal childcare, expanding free provision for 2, 3 and 4 year-olds
- Reverse Tory cuts to education spending. Introduce a fairer funding formula that leaves no school worse off and redresses historical underfunding of some schools
- An extra £7.4 billion a year for the NHS. Re-focus on standards of service for A&E, waiting lists, and cancer treatment
- A real commitment to public health with a childhood obesity strategy in the first 100 days

"As a medical doctor working in public health, I know how important it is that we prioritise helping people to lead healthy lives. I also understand the need to provide sufficient funding for the NHS and will fight for the services we need in our area"

And finally ... an answer to the Teville Gate problem?

Labour will put people and communities at the heart of town planning, not developers' profits. We will update compulsory purchase powers to make them more effective in driving regeneration and unlocking stalled developments

Only Labour can challenge the Tories in Worthing West. Don't waste your vote. Vote for change.
