

Our Gregory Electorate students often face many barriers to participating in tertiary education, be it university or vocational studies. My hope is this booklet will make it easier for our young people to obtain the skills they need and bring them back to our communities.

A scholarship can help you get on your way to achieving your study goals by assisting with an array of costs, including textbooks, tuition fees, accommodation and living expenses. But there are many more benefits of applying for a scholarship. Many of the vital skills required when applying for scholarships are the same skills required for successful job applications. You can also add your scholarship award to your resume. Some scholarships offer opportunities to undertake paid work experience with your scholarship donor or sponsor, play sport, travel overseas or perform.

Confidence is also gained from a successful scholarship application, giving you belief in your skills and ability. There is recognition and prestige associated with being awarded a scholarship.

It is astounding that people can access any song or video in the world in no time, but struggle to find scholarship opportunities. My advice is to investigate your options early, as the amount of information to read and applications to complete can be overwhelming.

By producing this booklet, I hope to provide students and their families with a sample of some of the scholarships that are available and offer links to find them. These links may lead you to discover other scholarship opportunities.

I encourage every student to investigate whether they may be eligible for a scholarship and wish you well in your application.
