

OUR COMMITMENT TO YOU

DURING THE REGENERATION PROCESS

No one underestimates the potential distress that regenerating an estate could cause for current residents. To reduce this as much as possible, we are committed to keep uncertainty for residents to a minimum by giving all residents the information and support that they need to make the best choices about their and their families' futures.

INFORMED

We believe that effective communication and information sharing is a vital part of involving you, the residents, in what happens to where you live.

We are doing lots of different things to make sure that as many of you as possible are aware of what is happening, how you can be involved and what you can influence.

INVOLVED

By holding regular events we will be making sure that you can give your informed opinion and that we can understand your views.

By being involved at our workshops, exhibitions and the study trips you can help us understand what a better home would be for you.

INFLUENCE

By telling us your priorities and concerns you can influence some of the decisions made by the Council, Architects & Development Managers going forward.

Whilst your estate is going to undergo regeneration to provide more and better homes, by letting us know your priorities you can help shape the design of the estate.

NEWSLETTERS

We will be delivering monthly newsletters, sharing contents of workshops, meetings and events and to raise awareness.

WEBSITE & EMAIL

The contents of the newsletters and information about events will also be sent out by email and uploaded to: estateregeneration.lambeth.gov.uk/westbury

DOOR KNOCKING

We will be door knocking throughout the process to make sure you know what is happening and are aware of upcoming events.

LETTERS FROM THE COUNCIL

At key points you will receive letters from the Council regarding how the regeneration plans will affect you.

DROP-IN SESSIONS

The Council will hold monthly drop-in sessions for you to get more information and advice on how the plans might affect you.

STUDY TRIPS

There will be two trips to go and see examples of interiors and play spaces in order to get your views and ideas.

WORKSHOPS / MEETINGS

Monthly workshops will explore design principles, and important aspects and considerations for the regeneration

PUBLIC EXHIBITIONS

Exhibitions allow us to share progress and give you the opportunity to ask questions and give feedback.

RESIDENT ENGAGEMENT PANEL

The Resident's Engagement Panel (REP) acts as a sounding board for the Council so that they can understand issues from a resident perspective.

DESIGN OF BESPOKE ELEMENTS

We would like residents to share ideas for some bespoke elements for the new estate - this could be public art, play areas, signage or wayfinding.

DESIGN OF NEW ESTATE

By coming to our events and providing your feedback you can influence the design for the estate and what your new home will look like.
