

Psychotic Bankers Are Driving Your Children Mad and Sending Them to the Front Lines

Isn't It Time to Create a Future With LaRouche? By an extraordinary effort including the urgent raising of publishing funds, the EIR dossier, "CO₂ Reduction Is a Mass Murder Policy—Designed by London and Wall Street (PDF)," is coming off the press just in time to enable Lyndon LaRouche's movement to defeat a move for global bankers' dictatorship. Read, print, and circulate this dossier.

The world's biggest bankers came out in New York on Sunday, on the eve of the UN's "Climate Action Summit," to claim the City of London and Wall Street finance's ownership of the "green renewables" movement, which supposedly responds to a "climate emergency." These 130 banks declared that the "principles of responsible banking" were now the principles of the Paris Climate Accord—drastic reduction and scheduled elimination of fossil-fuel production and industry worldwide, enforced by the financial sector's withdrawal of investment. These global banks, led by Bank of England Governor Mark Carney's Green Finance Initiative, have been planning this *since the Paris Accord in 2015*.

Then what are all the children's climate crusades for? the psychedelic Extinction Rebellions, the Friday school closings, the Greenpeace saboteurs, the Greta Thunberg's preaching hate of parents and babies as well? They are to try to force the physical closing of industry, and to support the massive taxing of populations to proliferate throwback "green" energy technologies. This, these banks hope, can be *their* new deal, the new green financial boondoggle which can provide another round of taxpayer-supported super profits.

Wall Street, London and Frankfurt banks are facing

another huge debt blowout, centered in corporate debt this time, but another, worse 2008. They think anti-industry, anti-population "eco"-fascism is their way out.

Lyndon LaRouche saw through these operations as no one else has or can, beginning 50 years ago when he counterattacked the Club of Rome's false *Limits to Growth* and destroyed it with his 1983 book, *There Are No Limits to Growth*. Of course, the few nationalist leaders like President Donald Trump and Prime Minister Narendra Modi, who teamed up this weekend, are opposite to this anti-industrial bankers' dictatorship. So are Russia's President Vladimir Putin and China's President Xi Jinping. But LaRouche devoted his life to exposing British "ecologism" as eugenics and combatting it with programs of long-term scientific and technological progress, led by space exploration and fusion power development.

The new 64-page EIR dossier is a weapon representing LaRouche's method. "Use it to the hilt," as Schiller Institute President Helga Zepp-LaRouche said today, and defeat these banks. Break them up by restoring the Glass-Steagall Act, to protect industry and national populations against financial collapse.

LaRouche forecast that the leaders of those four powers, uniquely, could defeat the British Empire if they cooperate in space, in plasma technologies, for high-technology development of all nations. If they are to do it, LaRouche must be posthumously exonerated from the FBI's false prosecution, to "exonerate" his economic policies and his ideas.

What those leaders need is to exonerate LaRouche in 2020, and be on the Moon in 2024!
