

## Mueller's Coup Plotters Panic — Their Own Crimes Stand Exposed

December 7, 2017—The U.S. forces serving the British effort to remove Donald Trump from office — Obama's intelligence officers; the Obama/Clinton Democrats; and the Neocon Republicans — are beginning to panic. The chosen hitman to destroy the Trump presidency, Robert Mueller, cut his teeth as the head of the "Get LaRouche Task Force" in the 1980s, which was intended to destroy the movement founded by Lyndon LaRouche. Despite sending LaRouche and several of his associates to prison on false charges, Mueller failed to destroy that movement, and he is now paying the price for his failure. The EIR dossier, "Robert Mueller is an Ammoral Legal Assassin: He Will Do His Job If You Let Him," has permeated the political and diplomatic institutions in the United States, prodding Congress and others into action to stop the coup, pointing directly at the British architects of the treasonous conspiracy — MI6's Christopher Steele and others.

The effort to destroy LaRouche and the similar effort to destroy Trump are aimed at the same fundamental end — both LaRouche and Trump are intent on ending the British division of the world between East and West, which keeps the world teetering on the brink of thermonuclear war between the U.S. and Russia and China. Just as LaRouche proposed the unity of the "Four Powers" (Russia, China, India, and the U.S.) to end the British Empire and unleash global development, so President Trump is insistent on friendship and cooperation with Russia and China. As he said in his speech in Beijing: "There is much that binds the East and the West." To British geopoliticians, those are fighting words.

But the British house of cards is crumbling. The Mueller team stands exposed as partisan warriors, their vitriolic hatred for Trump, and their slavish following of the Obama/Hillary war policy, exposed in emails from their own sordid personal lives. And, they are beginning to panic.

Joe Biden, for instance, perhaps trying to prove his subservience to the Empire in order to be chosen to be the Democrat fill-in for the failed Hillary Clinton in the next presidential election, co-authored a psychotic diatribe against Russia in the Dec. 5 issue of Foreign Affairs, the quarterly of the British imperial outpost in the U.S., the Council on Foreign Relations. Titled "How

to Stand Up to the Kremlin — Defending Democracy Against Its Enemies," Biden says the U.S. must "deter Russian military aggression," implement thought-policing to "root out Russian disinformation and subversion and find ways for authorities to cooperate with the private sector to counteract such meddling." The evil Russians, he rants with McCarthyite passion, have "successfully fused organized criminal groups, intelligence agencies, and corrupt businesses" (sounding very much like a description of the Obama/Bush regimes in the U.S.). Trump, he adds, has refused to believe (the lie) that Russia stole the election, "even after he received briefings from top intelligence officials" — referring, of course, to the criminals Clapper, Brennan, and Comey.

Increasing calls for Mueller's ouster are now appearing in mainstream media — the stench is too strong to continue the cover up.

Another sign of lunacy hit the floor of the Congress yesterday, when Texas Democrat Al Green introduced articles of impeachment against President Trump. It was quickly voted off the floor, but 58 Members of Congress exposed themselves by voting with Green.

What the British fear most is that the American and European population will catch the Spirit of the New Silk Road, the New Paradigm being implemented in nearly every other part of the world through real, physical development projects being led by China and Russia. Across Africa, Ibero-America, and Asia, nations held in limbo by colonial and post-colonial controls for centuries, are being rapidly transformed towards modern industrial nations, their populations escaping from poverty, given hope, just as China has transformed itself in thirty short years. In fact, this spirit is awakening nations and citizens even in Europe and the U.S., especially in the wake of Trump's highly successful meeting with Xi Jinping and the Chinese commitment to invest \$283 billion in rebuilding the decayed American infrastructure and industrial capacity — for starters.

There is no longer any justification for tolerating the economic and cultural decay in the West. The ideas presented over the past fifty years by Lyndon LaRouche are now being implemented, taking on a physical force in the world. This is our time.
