I believe in the overriding principles and aims of A Federal Liberal Democrat party within the nations and regions of the UK. If the Scot Nats are ready for another go at independence we need to broaden our appeal and be a bolder voice for a better alternative to less power at Westminster. Even remainers want more distance from Westminster. Our sell in Scotland is the simple message that we have more powers than we think and a new constitution(everyone wants that at broken Westminster) is the key. Our messaging needs to be different, dynamic and simple to best persuade how federalism can best be applied in the United Kingdom.
