A caring society

Ed was just four when his dad died, and he grew up as a young carer to his mother who died when he was 15.

When the situation calls for it, he has shown remarkable strength, and that's what we need now.

And it's his lifetime experience of caring that drives so much of Ed's politics, and motivates his **tireless campaigning for more NHS investment and a better deal for carers.**

A green revolution

We have a once in a lifetime chance to **rebuild our economy and fight the climate emergency.** Ed will use his experience – as an economist and creating green jobs – to tackle these issues.

Ed fought the Tories in Government and won, more than trebling the UK's renewable power, **making us the world leader in offshore wind,** and setting us on a path to slash carbon emissions.

Using that same experience, **he's put together the biggest proposed investment in the green economy** – over £150bn over three years.

A winning record

Ed has been a campaigner for more than 30 years, and in Parliament for more than 20, **giving him the unrivalled political experience** our party needs to rebuild after the 2019 election. **He understands what's needed to win.**

He's built teams in Kingston that have consistently won at local and national level since 1997, and **many of the most successful campaigners** in the party are backing him.

Tim Farron MP

Westmorland and Lonsdale

"Ed Davey is a **proven winner** and he understands what we need to do to **win right across the country,** including in Conservative facing areas like mine."

Sarah Olney MP

Richmond Park

"We need a leader with the **life experience, ideas and judgement** to take us forwards. **Someone who has been there, and won.** Ed Davey is that leader."

Vote for vision, experience & leadership

A champion for green values

A vision for our communities

Ed has the vision to take the Liberal Democrats forward.

To beat the Tories at the next election, we must **first grow much stronger as a party ourselves.**

That's why Ed has prioritised his **Green Recovery Plan** for Britain's post-COVID economy, using his unrivalled record in delivering green jobs in less well-off communities and his training as an economist.

Ed would also demand a **caring revolution**, including an increase in the carer's allowance and a **universal basic income for everyone**, to help transform the UK into a more caring society.

There are no quick fixes in politics. What Ed's offering is the vision and experience to help rebuild the Liberal Democrats.
