

Scott Ek
Minnesota Public Utility Commission
121 7th Place East, Suite 350
St. Paul, Minnesota 55101
Attention: Line 3 Replacement Applications

RE: Docket Numbers: PL-9/CN-14-916 and PL-9/PPL-15-137; Line 3 Replacement Project Second Revised Final Environmental Impact Statement (FEIS) Comments

Dear Commissioners:

Please find attached a comment in support of Enbridge's Line 3 Replacement Project on behalf of Pipeliners Local 798, a trades union representing the nation's best industry workers.

Our members recognize this project is a critical investment in Enbridge's Mainline System, which is already an essential, yet aging, component of North America's pipeline transportation network. This is why our members collected 4,122 signatures on the attached comment urging Minnesota regulators to approve necessary permits for this critical project.

Line 3 is one of the most studied pieces of energy infrastructure, and Enbridge has consistently demonstrated its commitment to mitigating environmental impacts. We are particularly frustrated with the Minnesota Public Utilities Commission's request for a revised EIS because the Commission had previously found the project's FEIS adequate.

Thousands of jobs are in jeopardy, many belonging to the proud members of Local 798. The people of Minnesota and the surrounding region cannot afford any further delay. This is why we ask that you swiftly approve the requested license and permit applications for the Line 3 Replacement Project.

Sincerely,

Danny Hendrix
Business Manager

Pipeliners Local 798

Attention: Line 3 Replacement Applications

RE: Docket Numbers: PL-9/CN-14-916 and PL-9/PPL-15-137; Line 3 Replacement Project Second Revised Final Environmental Impact Statement (FEIS) Comments

Dear Commissioners:

I stand with Pipeliners Local 798 in expressing frustration with the Minnesota Court of Appeals' decision to invalidate the final environmental impact statement (FEIS) for Enbridge's Line 3 Pipeline Replacement project. Just last year, the Minnesota PUC unanimously found the project's 13,500-page FEIS adequate.

The decision is particularly upsetting because this review was based on the most extensive environmental study of a pipeline project in state history. The final route reflects years of environmental and cultural studies. In addition, project leaders have demonstrated consistent engagement efforts with Tribes, individual landowners and local communities to ensure the most responsible plan would be implemented. These collaborations resulted in more than 50 route changes of the line.

The FEIS is the product of a comprehensive interagency effort that included the environmental branch of the Minnesota Department of Commerce, the Minnesota Pollution Control Agency and the Minnesota Department of Natural Resources. The court's decision will likely send the FEIS back to the state Public Utilities Commission (PUC) for further review, delaying construction beyond 2020. This delay will deny millions of dollars in tax revenue to local communities and threaten thousands of pipeliner jobs, many belonging to Local 798.

Once in operation, Line 3 will provide a much-needed update to Enbridge's Mainline System, ensuring that it continues to safely transport energy required to meet growing demands from eastern Canada to the Gulf Coast.

The court upheld the majority of the environmental study's findings, excluding the possible impact on the Lake Superior watershed, and I believe key decision makers should approve pending license and permit applications for the Line 3 Replacement Project for the following key reasons:

- Line 3 will provide access to a reliable and secure energy supply to meet growing demands;
- Enbridge has demonstrated plans to restore 99.98% of the potential wetland impacts during construction;

- Replacing aging infrastructure is critical in order to safely meet the region's growing demand for reliable energy across;
- Line 3 construction will create thousands of well-paying jobs for local craftsmen and generate tens of millions of dollars in critical tax revenue for local communities in MN, WI and ND.

Minnesota residents and craftsmen deserve the economic and environmental benefits from Line 3. This is why I urge key decision makers to issue necessary license and permits for this important project.

Signed,

Line 3 Pipeline Replacement project supporter
