

2015 Vergennes Sidewalk Survey Instructions

Thank you for participating in the 2015 Vergennes Sidewalk Survey! Your help is crucial in assessing the current conditions of sidewalks in the city. This information will be used to help identify and prioritize areas needing improvement.

How to conduct the survey:

- 1) Locate and proceed to the street section designated at the top of your survey form.
- 2) Walk the length of your designated street section, paying attention to the overall condition of the sidewalk in that section.
- 3) Circle the rating level (5-0) of your section using the condition assessment examples.
- 4) Circle Y or N about how your section is wheelchair-friendly at intersections.
- 5) Circle Y or N about how your section is standard width (approximately 48 inches).
- 6) Add any comments that you want to include about your section.
- 7) Take a photo of any part of your sidewalk section that should be included (for example, wide cracks, vertical displacement, or even if the sidewalk is in great condition). Please be sure to identify the sidewalk section with your photo and mark the location on the provided map!
- 8) Return the completed survey and photos to your survey coordinator.

It's that easy!

Once again, thank you for your assistance.

2015 Vergennes Sidewalk Survey Condition Assessment Examples

Level 5: Brand new or excellent condition. No sidewalk distress found

Level 4: Very good condition. Narrow sidewalk cracks.

Level 3: Good to above average condition. Small sidewalk cracks.

Level 2: Below average to average condition. Wide sidewalk cracks and small vertical displacement.

Level 1: Poor condition. Cracks and large vertical displacement.

Level 0: Totally deteriorated or nonexistent. Serious surface defects.
