Protect our Farmland, Communities and Heritage - Fix the RPIA!

Dear Premier and Leader of the Opposition,

The Regional Planning Interest Act 2014 (RPIA) was intended to protect areas of regional significance but it has failed us, time and time again[1].

Queensland's best farmland, significant cultural heritage sites, water resources and local communities are still being sacrificed to the ever expanding coal and gas industries.

We ask that you strike the balance between mining and regional development, once and for all by reforming the Regional Planning Interest Act to stop mining and unconventional gas encroaching on our precious places.
