- A. Click on *Label Designer*
- B. Tick Circle and Radiant Yellow
- C. Click on 70mm

The label designer page will open.

- D. It will open with the Text step. In this step, left click on the *sample text* in the yellow circle and drag it out of the circle
- E. Click on *Images and Artwork*
- F. Click on *Upload your own image*. A popup will open for you to select the appropriate sticker file that you saved to your computer. Your image will appear over the yellow circle. Do not worry that the yellow disappears, Sticky Labels prints on yellow paper and a bug means that the transparent image files show a white background. It will print with black text on yellow paper.
- G. Use the slider to enlarge your image file to fill the circle (leaving a small border around the text).
- H. Use the icon with a series of lines to centre the image. You may find that you have to use the enlarge and centre tools a few times to get it perfect.
- I. Select how many stickers you want in the drop down and proceed with your order.
