

Mounties,

I just wanted to follow up on my earlier email with some great news. Public Works let us know this morning that the new trash and recycling program will be able to go into effect once the new containers are delivered to your home the week of September 24-28 - i.e., you can start using the new containers right away!

In addition, Public Works will tape a paper notice on the inside of your new trash lid. The notice will contain instructions detailing when you can leave your old trash and recycling containers on the curb for Public Works to dispose of if you so choose. Remember, you can keep your old containers for things like yard waste if you want.

Other than that, you can still expect to receive your new trash and recycling containers September 24-28. There is a chance some containers will be delivered on the 29th if the vendor runs into problems.

Puzzles this big can always run into unexpected delays, but we'll keep you updated should anything change.

Thank you everyone for your patience and understanding.

Cheers,
Luke
