

Page names

If someone has already used the name "calendar" then you will need to name yours something else. Baltimore County named their calendar "balt_calendar".

If you choose a name that is already in use, even though you cannot see it, the site will not allow you to get by step one of page creation (the creation of the "slug") until you find a unique name.

You can rename pages. All links to a page get updated automatically, which is really cool!

Note that pages have lots of names. There is the Internet search name, the slug and the page title. The page title displays at the top of every page, so if you are on a page where you don't want the title, delete it on the settings tab!
