

Embed Google Calendar

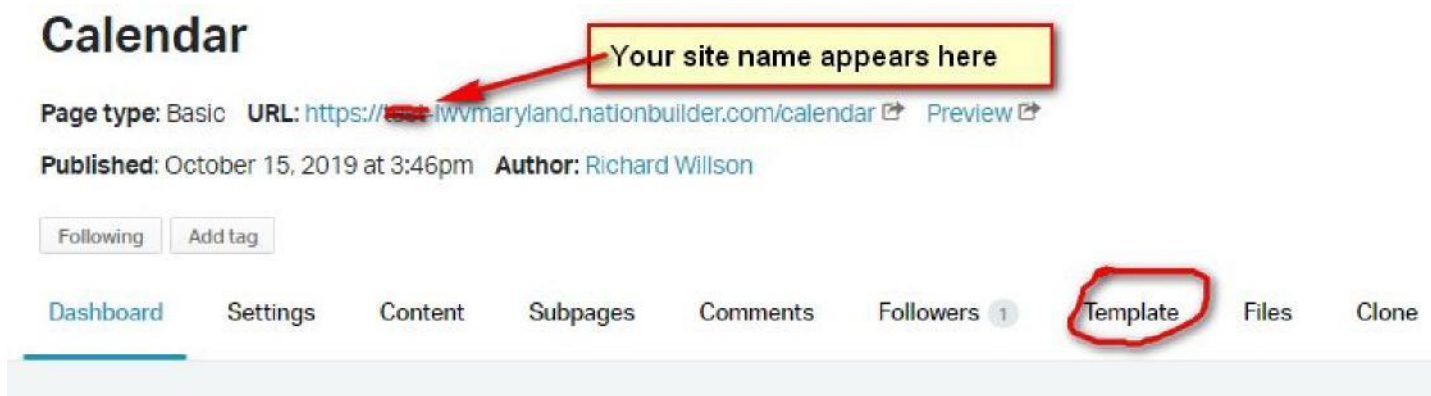

1. From your Google Calendar, select Settings in the upper right-hand corner by clicking the gear and then selecting "Settings" again from the drop-down menu

2. On the left side of the screen, click the name of the calendar you want to embed.
3. In the "Integrate calendar" section, copy the iframe code displayed.
4. Under the embed code, click Customize.
5. Copy the iframe code into your computer clipboard. There are lots of additional steps, so you may want to paste the code into a document where you can find it later, or just leave the Google Calendar settings page open so you can come back and copy the embed code again later

The next step is to create a page in NationBuilder where you will embed your code

1. Create a new NB basic page named Calendar. The State named theirs MDCalendar.
2. Select the Template menu option circled here

3. You will paste your Google Calendar embed code on line 17

```
1  {% if page.is_homepage? == true and site.page_tags contains "homepage" %}
2
3  <div class="container">
4
5  <div class="row">
6  <div class="col-sm-8 col-sm-offset-2">
7  {% if page.headline.size > 0 %}
8  <h2 class="headline">{{ page.headline }}</h2>
9  {% endif %}
10 <div id="content">
11
12 <div id="intro" class="intro">
13 <div class="text-content">
14 {{ page.basic.content }}
15 </div>
16 </div>
17
18 </div>
19 </div>
20 </div>
```

4. Save the page, enjoy!
