

Proposal membership fees 2021

In this document, the LYMEC Bureau proposes the membership fees for 2021. The membership fees of LYMEC were adjusted 2017 and 2018. This year, also taking into account the current economic situation, the Bureau does not propose to change the membership fees for 2021.

Full Membership Fees

The bureau proposes the following, in line with the membership fees of 2020:

Proposed Full Member fee: 200 euros + 0,06 euros per member, maximum 1200 euros

As is common practice, the Bureau proposes a 1.200-euro cap, which would take into effect from approximately 16.700 members onwards. Only one of our organisations currently has more than 16.700 members. If the cap would not be added, the fee of that organisation would skyrocket.

Associate Membership Fees

LYMEC has several Associate Members. According to our statutes, those organisations have mostly the same rights as full member organisations, but they cannot vote and they cannot propose candidates for Bureau. Since Associate Members don't have any voting rights, the fee is not based on membership, but fixed. The Bureau proposes to keep the existing fee.

Proposed Associate Member fee: 175 euros

Individual Membership Fees

The LYMEC Bureau does not propose any changes to the fees for becoming a member of the Individual Membership Section (IMS), seeing as this sum was adjusted as of 2019 due to inflation and development of the IMS.

Proposed annual IMS fee: 15 euros

Proposed 5-year IMS fee: 50 euros

Proposed lifetime membership (valid until 35 years): 100 euros
