Q2

Party Affiliation

Respondent skipped this question

Q3

Office Sought

US House**Q4**

District

79

Q5

Incumbent?

No**Q6**

Do you believe that scientific fact and the advice of health professionals should be paramount in decisions regarding public health crises like the COVID-19 pandemic?

No

Q7

Please expand on your answer to the question above.

We have survived by, "herd mentality," since the beginning of dawn. This has crippled us, and set us back as a nation, and made the wealthy, richer. We are not going off of scientific fact. You can catch a virus thru your eyes. The numbers do not represent a pandemic. Staying healthy will stop you from catching viruses every year. The middle class is shrinking and the poor suffering more than usual. We have a recession to depression on the horizon. Its eminent. This is another strain of the flu. The numbers have been incorrect in many things since the beginning. This is a terrible way to handle any crisis by all involved. Sloppy in my opinion. You would need a hazmat suit and complete face coverage to protect you from this strain of flu being covid-19. If you have underlying conditions, then you are subject to many strains of viruses and bacteria that you already take daily precautions against. Breathing in your own carbon dioxide for too long is hazardous to your body from my understanding.

Q8**Yes**

Do you believe that proof of citizenship should be required in order to register to vote?

Q9

Please expand on your answer to the question above.

Yes, proof of citizenship in your region by the rules. If you have disabilities then every effort should be made for an American to vote, in the elections they qualify for.

Q10**Yes**

Do you believe that laws covering the sale of firearms are sufficient? If yes, why? If no, do you believe they should be made more strict, less strict, or kept as they are now?

Q11

Please expand on your answer to the question above.

This is America. A capatilistic nation. When we start caring about each other from the top down, then this view will change for me. Everything is connected. History shows govts turning on the people, when they become to wealthy. This seems to be an issue now. I believe in the 2nd Amendment, and I am all Union. If I was to pass any law, it would add a certified course, and incorporate the price into the purchase of a legal gun. Guns sold, and made in America would get a discount. A percentage of sales tax could go to safety education in weapons. Education of history to present needs to be taught, and role our nation has as the top maker of weapons of war. We are the top leading exporter of weapons, and in the top importer of ammunition and hand guns. Teaching the facts about guns and victim panels, that represent actual death in the training will control many issues of gun violence. Changing the economic stand point of all humans would not only vanquish the need of guns. One day the need for them would vanish.

Q12**No**

Do you support amending the Kansas Constitution to eliminate the protection for individual reproductive freedoms contained in the Kansas Constitution?

Q13

Please expand on your answer to the question above.

There will sooner or later always be a situation that abortion is needed. Its sad. I am an information and solutions guy. I have looked into this in depth. We do not give the information needed for parents to understand the abortion industry in this nation. We only classify abortion by ethnicity and age group, but not financial. We also don't tell the truth about how "Stem Cell" research is involved in planned parenthood. That doctors pushing for a D&E procedure are only telling half the equation when it comes to the safest procedure. They are not saying that this is the best viable stem cells is a fetus in the 2nd trimester for a D&E. This is becoming more business and the information hidden and only those in certain financial brackets reaping the miraculous rewards of stem cell research. Its the information and education and the way it is distributed that changes the mindset of Americans. We are not telling the whole story. Economic change would alter this as well. Then only the drastic decisions would have to be made about lives that would truly reflect humanity.

Q14**Yes**

Do you believe that diversity in representation is critical to effective governing? If yes, as an elected official what will you do to promote and engage leaders who more accurately reflect the diversity of members in our communities?

Q15

Please expand on your answer to the question above.

Learning and changing is a key factor in being a good official. Understanding that listening and hearing are not the same things. They have a different cause, and effect. These components associate real solutions for real problems. I would have an open door policy to listen to all ideas brought forth. Even go as far as to listing ideas and their contributors. I love solutions. I don't care where they came from, if they work for the whole, then I am on board.

Q16**Yes**

Do you believe climate change is real and caused by human activity? If so, what policies should legislators pursue to improve climate resilience?

Q17

Please expand on your answer to the question above.

Climate change is a natural event, but has been altered by the human condition. I would look into any policy that I could be on board with producing the best environment for humans on the planet let alone Kansas. We have a right to clean air and water. I would reduce the need for consuming natural resources like oil and wood by removing restrictions on HEMP production. Stop all fracking jobs immediately! Fracking continuously destroys drinking water. Cross train workers from one natural resource field into another. Hemp covers all areas of equitable and sustainable resources. Planting of trees in history was used to help control the dust bowls of Kansas. Power companies have been cutting these tree lines down. Replanting them is beneficial to our safety. Dredging rivers and creeks needs to be done to help with the flooding that is increasing across the nation. Better communication between neighboring states during hazardous conditions. So much comes to mind that would help put Americans back to work on so many levels.

Q18**Yes**

Do you support amending the current Kansas Act Against Discrimination to include the same protections for sexual orientation and gender identity?

Q19

Please expand on your answer to the question above.

and no. There are many businesses that could not afford the alterations to older businesses to accommodate the entire language of the Act, if I read it correctly. I almost agree with the entire thing. Everyone is equal, with respects to seniority over all. Another economic issue that could be corrected if we treated each other fairly. When we truly represent each other these things would no longer be an issue.

Q20**No**

Should public funding be available for private school tuition via tax credit scholarships, education savings accounts, vouchers or other methods? What is your opinion about the current funding for Kansas schools?

Q21

Please expand on your answer to the question above.

Public funding should only be available to schools that accommodate those with disabilities and public schools. Besides this, all private, and charter schools should be closed. Put all resources into a better educated public school system and add more teachers per student. The students on a whole would benefit more as well. Charter schools are not held accountable like public schools are. I am not sure how the money became so diversified.

Q22**Yes**

Do you support Medicaid expansion at a time when pandemic-induced job loss has left thousands of Kansans without health care coverage?

Q23

Please expand on your answer to the question above.

No human in America should go without health care coverage. Medical and recreational cannabis would help EVERY department of Kansas, not just health care. Would even create jobs when needed the most. That is what being human is about. Helping, being better daily. Cannabis=Jobs Jobs=Resources Resources= Stability Stability=Happiness Remove or reduce the laws on hemp productions. This new found revenue will benefit all areas that have succumb to short falls in budgets. 34 other states are bringing in MILLIONS from legal cannabis to cover these deficits. It's time we stop lagging behind and really care about Kansans.
