

## Facts

---

Climate change alarmism is based on flawed models that have consistently failed at correctly predicting the future. None of the cataclysmic predictions that have been made about the climate since the 1970s have come true. No new ice age. No steady warming in direct relation with increases in CO<sub>2</sub> levels. No disappearance of polar ice caps. No exceptional rise in ocean levels. No abnormal increase in catastrophic weather events. No widespread crop failure and famine.

In fact, CO<sub>2</sub> is beneficial for agriculture and there has recently been a measurable “greening” of the world in part thanks to higher levels. Despite what global warming propaganda claims, CO<sub>2</sub> is not a pollutant. It is an essential ingredient for life on Earth and needed for plant growth.

## Our Plan

---

Given the uncertainties over the scientific basis of global warming, and the certainties about the huge costs of measures designed to fight it, there is no compelling reason to jeopardize our prosperity with more government interventions.

### **A People's Party government will:**

- Withdraw from the Paris Accord and abandon unrealistic greenhouse gas emission reduction targets.
- Stop sending billions of dollars to developing countries to help them reduce their emissions.
- Abolish the Liberal government's carbon tax and leave it to provincial governments to adopt programs to reduce emissions if they want to.
- Abolish subsidies for green technology and let private players develop profitable and efficient alternatives.
- Invest in adaptation strategies if problems arise as a result of any natural climate change.
- Prioritize implementing practical solutions to make Canada's air, water and soil cleaner, including bringing clean drinking water to remote First Nations communities.
