

# ABC'S OF WATER: THE WATER-ENERGY NEXUS

## Measuring Energy and Greenhouse Gas Emissions in the Water Sector

As climate change continues to impact the environmental, political, and economic spheres in the United States and beyond, organizations and agencies like The Climate Registry have turned to innovative policies and technologies in their pursuit in curbing this looming threat. Join Ryan Cassutt and Alissa Benchimol from The Climate Registry at the next ABC's of Water where they will provide an overview of the Water-Energy Nexus Registry, discuss how this program helps them understand the water sector's carbon footprint, and illuminate how it can help water managers and consumers better understand the impact their choices regarding energy and water have on greenhouse gas emissions. This is the final lecture in a two-part series looking at innovation in the water industry. Email Public Information Specialist Bryan Kawasaki at [bkawasaki@mojavewater.org](mailto:bkawasaki@mojavewater.org) to RSVP.
