

MBCA News  
Thursday, March 13, 2014

MBCA has sent you many messages about the Desert Renewable Energy Conservation Plan – the DRECP. We have also encouraged and appreciated your attendance at several local meetings about this statewide attempt to evaluate and direct the placement of industrial-scale projects in *our* Mojave Desert.

A great opportunity to learn more about the DRECP occurs ***this Saturday*** at the Desert District Advisory Council meeting of the Bureau of Land Management. Although they will be covering several other topics, the Focus Topic for their meeting is the DRECP, with guest presentations including “Mechanics of the DRECP Public Process” and “DRECP Web Tool Demonstration.” The public is welcome at these meetings.

The DRECP section of the meeting begins at 10:45 AM, and continues until 2:50 PM. You will come away with a wealth of current information on the latest issues of the DRECP by attending this meeting.

Below are more details about the time and location.
