

**Ron Kliewer**

Ron has worked in the building industry on the cutting edge of energy efficiency since green was just the color of the building, not how it was built. He started as a carpenter, then General Contractor and Building Science Consultant. He is a certified Thermographer and Building Analyst. He has built research homes for Bonneville Power Administration and others. His work has been recognized across the industry, winning building awards such as The Leading Edge Design award and Energy Star for Small Business. He authored the white paper “Zero Net Energy Retrofits/ Gaps Identified and Lessons Learned”. He supports Southern California Edison with their Emerging Technology and Demand Response building research, including the Irvine Smart Grid, ZNE Residential, ZNE Multi-Family, ZNE Commercial, Title-24 energy code, and Battery Energy Storage field tests.
