

TAKE ACTION ON LINE 3

Line 3 will impact our communities, our farmlands, and our climate. We must unite as citizens and collectively stand up to the corporations which are profiting at our expense. Your voice matters!

MAKE YOUR VOICE HEARD

- Write letters to, telephone or meet with your local elected officials telling them not to issue road crossing permits for pipeline construction
- Writing an op-ed to your favourite news outlet to express your concerns
- Make posts and share information on social media

RAISE THE ISSUE IN YOUR COMMUNITY

- Hold community events to discuss the pipeline with your neighbours
- Raise your concerns to your faith or community group
- Get a "Stop Line 3" lawn sign from MEJC

SUPPORT THOSE OPPOSING THE PROJECT

- Support frontline land defenders
- Connect with and support landowners along the corridor
- Host a fundraiser to raise funds and awareness against the project

BE CREATIVE

- Challenge new pipeline development through visual art, theatre, installations, or other creative means
- Use photo, video, or other media to document the places you love and express why you want to protect them

SUPPORT THE MANITOBA ENERGY JUSTICE COALITION

- Support the Manitoba Energy Justice Coalition by donating online
- Sign up for our newsletter at mbenergyjustice.org to keep updated
- Follow us on facebook, Twitter or Instagram

The possibilities for action are numerous, and the time is now. As construction of Line 3 is slated to begin in Manitoba in the spring 2018, now is a critical moment to express our concerns about the project to our local and provincial governments, whose responsibility it is to protect our interests. Canada is at a significant junction in history, faced with the challenges and opportunities of a shifting energy landscape. We must take part in reshaping our energy systems for decades and generations to come.

ELSEWHERE ALONG THE ROUTE THERE IS HOPE...

Much of the construction is completed in Saskatchewan and Wisconsin but in Minnesota the project has yet to be approved.

The Minnesota Department of Commerce concluded the project should not be build at all and the old pipeline should be decommissioned

The Minnesota Public Utilities Commission said the Environmental Review is inadequate

The Minnesota Department of Human Rights raised questions about tribal impact due to the potential destruction of wild rice fields

**JOIN YOUR NEIGHBOURS AND ADD YOUR VOICE TO THE PUBLIC OPPOSITION
TO ENBRIDGE'S LINE 3 PIPELINE!**

THEY ARE LEAVING THE OLD PIPELINE IN THE GROUND EVERYWHERE INCLUDING YOUR BACKYARD....

Enbridge will be cutting and capping the old pipeline and will fill it with gas to prevent corrosion. However this inert gas pumped inside may not stay inside the pipe since according to Enbridge the pipe is currently "weeping".

"Line 3 has experienced an accelerated rate of deterioration associated with external corrosion, Stress Corrosion Cracking, and long-seam cracking due to the disbanded coating and fatigue growth of defects in the flash welded long seams. I consider Line 3 to be in the deterioration stage, as external corrosion growth is increasing in an exponential fashion."

- Enbridge representative Laura Kennett
January 31st 2017

**AT WHAT POINT WILL THEY COME BACK AROUND TO CLEAN UP AND
REMOVE THE OLD PIPELINE?**

**WILL ENBRIDGE STILL BE AROUND WHEN THE CLEAN UP CAN NO LONGER BE
IGNORED OR DELAYED?**
