2018 POINT IN TIME
Adams County Summary

This report summarizes the county level data for Adams County, Colorado.

The Point in Time is a snapshot of those experiencing homelessness in our community on a single night. This data was collected for the night of January 29th, 2018. The full Everyone Counts Metro Denver Homeless Initiative’s 2018 Point in Time report goes into detail explaining the methodology used while preparing for the count, executing the survey throughout the seven-county region, de-duplicating and cleaning the data, and extrapolation methods utilized. Refer directly to the regional report when interpreting the data contained in this county specific report. Additionally, previous county level reports included information for either “all homeless” or “respondents” as noted in each section. If comparing data between years, this methodology change needs to be considered. The “respondents” were only the individuals taking the survey, which does not include other household members such as children or adults. Only respondent data was reported for several categories in past county reports, including; veteran status, unaccompanied youth, newly homeless, and chronically homeless. This 2018 report provides data for “all homeless” in every category.

Adams County significantly increased their efforts for the 2018 Point in Time (PIT) count. These methods are described in more detail in the full report, and a short description of Adams County engagements is included here.

This year Adams County had a county level staff person lead the local PIT efforts, the homelessness liaison in the Office of Regional Affairs. The additional support at the county level aided the engagement of several levels of Adams County personnel including; staff of the county government, parks and recreation, and some law enforcement. The liaison supported the formation and facilitation of an Adams County Point in Time committee. This committee helped plan and execute the five of the six Adams County magnet events in Brighton, Commerce City, Northglenn, Thornton, and Westminster. In addition to these, one was held in the City of Aurora at the Aurora Day Resource Center also located in Adams County. The county homelessness liaison also planned and led the unsheltered outreach efforts, through mapping and coordination of staff. These efforts together led to an increase in identification of those living unsheltered in the community. The mobile survey was the preferred survey tool utilized throughout the county.

When comparing the annual trend for Adams County, please note that the Mile High Behavioral Healthcare (MHBHC) Comitis Shelter’s surveys were incorrectly attributed to Arapahoe County in 2016 and 2017. The program is located in Adams County, Colorado. This highlights one of the challenges of regional engagement and data reporting, especially when county lines are not well identified or known, and surveys are completed as a self-report. Additional steps were taken in 2018, including mobile locations services (electronic survey) and review of individual surveys (paper survey), to help ensure accurate attribution of county information.

The Point in Time (PIT) data references those persons that meet the United States Department of Housing and Urban Development’s definition of homelessness. Communities across the nation follow current HUD methodology guidelines for the count and tailor the survey to the needs of their own localities and regions. Persons in temporary living situations or who are at risk of becoming homeless (such as those staying with friends or family or paying to stay in a motel) are not included in this count. The definitions below describe the guidance in more detail.

1 Metro Denver Homeless Initiative, 2018 Point in Time report - https://www.mdhi.org/pit_reports
HUD PIT Homeless Definitions: Continuums of Care (CoCs) must count all individuals or families who meet the criteria in paragraph (1)(ii) of the homeless definition in 24 CFR 578.3. This includes individuals and families:

**Sheltered Count**
“living in a supervised publicly or privately-operated shelter designated to provide temporary living arrangement (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low-income individuals)”

**Unsheltered Count**
“with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground”

---

3 Notice CPD-17-08_2018 HIC and PIT Data Collection for CoC and ESG Programs, HIC/PIT Data Collection Notice September 2017
SUMMARY OF ADAMS COUNTY 2018 POINT IN TIME DATA

Over two-thirds (317 or 68.0%) of those surveyed during the count were single individuals. The majority of these single individuals, 57.1%, stayed in an unsheltered location. Almost four fifths of families (79.2%) stayed in emergency shelters.

HUD HOUSEHOLD TYPE BY LIVING SITUATION

CHRONIC HOMELESSNESS

HUD defines persons experiencing chronic homelessness as those who (a) are homeless, (b) are living in a place not meant for human habitation, in a safe haven, or in an emergency shelter, (c) have been homeless and living in a place not meant for human habitation, a safe haven, or an emergency shelter continuously for at least 1 year or on at least four separate occasions in the last 3 years where the combined length of time homeless across those occasions is at least 12 months, and (d) have a disability.

Table 6. Living Situation – Experiencing Chronic Homelessness

UNACCOMPANIED AND TRANSITION AGE YOUTH

Unaccompanied or Transition Age Youth are defined as single youth who are under the age of 25 and not accompanied by a parent or guardian. Transition age youth are specifically those between 18-24 years old. Parenting youth are defined as those in the household that are under 25 years of age, and the guardians of a child under the age of 18.
