

# Could your congregation go solar?

July 26 &  
August 6  
at 9:30am  
in Detroit

## Solar 101 Workshops for congregations

Houses of worship around Michigan are using solar power as a way of caring for God's Creation and taking control of their energy usage. Could solar work for your congregation? This introductory session will answer:

- Is my facility a good candidate for solar power?
- How much does it cost and how can my congregation pay for it?
- How much could my house of worship save on electric costs every year?

Come and talk with solar experts and members of churches who have installed solar panels. We are offering the same workshop *twice*—pick the one that works for you!

Thursday July 26  
9:30am-1pm  
Gesu Catholic Church  
17180 Oak Dr., Detroit

Monday August 6  
9:30am-1pm  
Pilgrim Baptist Church  
18474 Binder St., Detroit

**RSVPs required.**

**Workshops are FREE. Lunch will be provided.**
