

<b>Form Summary</b>	
<b>Candidate's Name</b>	Brian Hakola
<b>Completed by (if other than candidate)</b>	
<b>House District Number</b>	18
<b>Preferred Phone Number</b>	586-216-2360
<b>Preferred Email Address</b>	bhakola@fastmail.com
<b>Verify Email Address</b>	bhakola@fastmail.com
<b>Campaign Website</b>	
<b>Upload a photo/headshot of the Candidate (optional)</b>	<a href="#">3BCD77F3-70AE-4C0D-A191-98BCC6235AF5.jpeg</a>
<b>Do you support setting a goal for Michigan to transition to 100% renewable electricity by 2050?</b>	No
<b>Do you support setting a goal for Michigan to be carbon-neutral by 2050?</b>	No
<b>You may elaborate on your position here:</b>	I believe the cost would be too great without nuclear Fusion. Also don't forget China and India are the world's greatest polluters we must make them meet certain guidelines
<b>Would you support state general funds or other state funding being directed to programs that support communities and workers most impacted by the climate crisis and the transition to renewables, including programs to retrain workers displaced by the transition off fossil fuels?</b>	No
<b>You may elaborate on your position here:</b>	Isn't this racism?
<b>Do you support the decommissioning of the Line 5 oil pipeline in the Straits of Mackinac?</b>	No
<b>Do you oppose the building of a Line 5 oil tunnel under the Great Lakes bottomlands?</b>	No
<b>You may elaborate on your position here:</b>	Bottom line is oil has to move one way or another.. find a better way then We can talk about it. I support creating safety standards.
<b>Do you support lifting the cap on net metering to allow more residents and businesses to participate?</b>	Yes

## Form Summary

<b>Do you support returning to net metering, and providing a fairer price to businesses and residents for the solar energy they generate?</b>	Yes
<b>You may elaborate on your position here:</b>	How can business buy energy and sell it for the same price and stay in business? It needs to be a win-win situation to really work
<b>Do you support policy that requires utilities to allow customers to build community renewable energy projects with fair rates?</b>	Yes
<b>You may elaborate on your position here:</b>	As stated it sounds like a perfect utopia but again this needs to be a win-win situation for both the consumer and the power producer
<b>Do you support policies to accelerate the adoption of electric vehicles (EVs), including EV infrastructure like charging stations?</b>	No
<b>Do you support policies and investments of state funds to help local communities and schools switch to electric transit and school buses?</b>	No
<b>Do you support policies and investing state funding to increase non-motorized transportation (like walking and biking) in Michigan communities, and to increase access to public transportation?</b>	No
<b>You may elaborate on your position here:</b>	I think all of these will obviously add more taxes I am not for new taxes in a perfect world it sounds great but remember somebody has to pay for it
<b>Have you signed the No Fossil Fuel Money Pledge?</b>	No
<b>You may elaborate on your position here:</b>	As things currently stand today how much land would be needed to create solar energy fields big enough to support all the electricity needs for Michigan how many batteries would have to be created to store that energy then when the batteries wear out do those not create a bigger problem of how to deal with the contaminants of the batteries? Also remember any real plan needs to include China since they produce approximately double the carbon emissions as the USA
<b>LAST THING BEFORE YOU GO: Would like to sign up to receive email from Michigan Climate Action Network? We will keep you updated on news about the climate in Michigan, share actions you can take to move the needle, and occasional emails about events to attend.</b>	No, Thanks
