Do you support setting a goal for Michigan to transition to 100% renewable electricity by 2050?	No
Do you support setting a goal for Michigan to be carbon-neutral by 2050?	No
You may elaborate on your position here:	<p>I support Renewable Energy but the 100% mark is too high. It costs a lot of money switching over. Coming up with that money isn't always easy and I am dead set against Raising Taxes or Energy Rates. People literally can't afford it.</p> <p>But I am on board for more Wind Energy and I am leading the Charge for E15 in our gasoline as we go from 10% Ethanol to 15% Ethanol. This will help our Farmers here in Michigan and boost Michigan's Economy heavily.</p>
Would you support state general funds or other state funding being directed to programs that support communities and workers most impacted by the climate crisis and the transition to renewables, including programs to retrain workers displaced by the transition off fossil fuels?	No
You may elaborate on your position here:	<p>What are we retraining them in? You can't just say fork out money to them from the Government all the time. Do you know what this costs? Where is the money coming from? Does money grow on trees?</p> <p>I feel bad for people put out of work, but retraining them doesn't mean they will get a job. So you spend all of this money and how many of them won't get anothe job?</p> <p>I am not trying to be an but just stating facts. I watched them say retrain the Auto Workers when they lost their jobs. Didn't work.</p>
Do you support the decommissioning of the Line 5 oil pipeline in the Straits of Mackinac?	No

Form Summary

Do you oppose the building of a Line 5 oil tunnel under the Great Lakes bottomlands?	No
You may elaborate on your position here:	<p>We have to have this oil. It is critical. I love the Environment. I don't like Polluting Places, but you have to find a Common Ground on things. We have to have this Oil. No ifs, No ands, and No buts about it.</p> <p>If we need to do the tunnel then let's do it. But we need that oil.</p>
Do you support lifting the cap on net metering to allow more residents and businesses to participate?	Yes
Do you support returning to net metering, and providing a fairer price to businesses and residents for the solar energy they generate?	Yes
You may elaborate on your position here:	<p>I am all for Wind Energy. I have been working on this myself for some time now. I prefer Wind Energy over Solar Energy because we have how many days with no sunlight in a year? Plus at night you don't produce in the Dark where with Wind you can produce Energy in the Dark.</p> <p>If people want to do Solar then more power to them. But I prefer Wind Energy.</p>
Do you support policy that requires utilities to allow customers to build community renewable energy projects with fair rates?	Yes
You may elaborate on your position here:	<p>If they are going to pay to build it then let's try it and see how it works. If there is a problem then you can always change things.</p> <p>But I need to know more about this plus the cost. I don't want to see people put a lot of money into something that doesn't work out very well.</p>
Do you support policies to accelerate the adoption of electric vehicles (EVs), including EV infrastructure like charging stations?	No
Do you support policies and investments of state funds to help local communities and schools switch to electric transit and school buses?	No
Do you support policies and investing state funding to increase non-motorized transportation (like walking and biking) in Michigan communities, and to increase access to public transportation?	No

Form Summary

You may elaborate on your position here:

People don't understand what is going to happen with the Electric Vehicle. As you go to all Electric Vehicles you need more Power Plants. They cost a Fortune for 1. You are going to need how many in Michigan? They will up your Energy rates for each power plant. Consumers Energy raised energy rates several times for the Mt. Morris Plant they never built. So your energy rates go up over 20%. Now you do this for let's say 8 plants. Energy rates go up well over 100%. This is on your house and businesses and etc.

Have you signed the No Fossil Fuel Money Pledge?

No

You may elaborate on your position here:

I haven't even been contacted by the Fossil Fuel Companies or PAC'S.

Saying No Fossil Fuels is dumb. Do you know that Plastic is made out of Fossil Fuels along with many other things.

I live close to Dow. I have a Degree in Banking / Financial Management. I went to College to be a Wall Street Stock Broker / Commodities Broker or work at the Federal Reserve Bank or IMF in Europe.

If you go away from Fossil Fuels you will have World War III in the Middle East and Africa and other parts of the World too.

LAST THING BEFORE YOU GO: Would like to sign up to receive email from Michigan Climate Action Network? We will keep you updated on news about the climate in Michigan, share actions you can take to move the needle, and occasional emails about events to attend.

Yes, Please
