

## DORS — DeskOfficer Online Reporting System

### Why Your Agency Should Launch Coplogic's DORS

- DORS is the only off-the-shelf citizen online reporting system that can interface with your records management system
- Hundreds of thousands of reports have been filed through DORS, proving that citizen online reporting is safe, reliable, and actively used by citizens across North America
- Citizens can submit supplements to reports so that officers no longer have to be taken off the street to manually enter property lists from commercial and residential burglaries
- DORS is UCR and NIBRS compliant so Records Personnel can be confident that reports are properly coded
- Multilingual support and ADA compliance makes your agency approachable and available to your entire jurisdiction online
- Most agencies recover the entire cost of the system within the first few months of use

### What Others Have Been Saying About the DeskOfficer Online Reporting System:

*"This new online reporting system has more than adequately met our needs; 26.3% of all our reports are now done online by the customer."*

-Chief Craig Steckler; Fremont Police Department, CA  
IACP Third Vice President

*"Thanks so much for implementing this! It makes things so much easier on our officers."*

-Dustin Hall; San Angelo Police Department, TX

*"... go-live went extremely well and APD is proud to publish your new service. It's been wildly more popular than we had anticipated."*

-Brian Metras; Anchorage Police Department, AK

*"You have earned my praise. I am astonished at the ease, simplicity, confidence, your service provides. Keep on!"*

-Michael; Resident of Santa Cruz, CA

*"Dear APD Online Officer,*

*I am a complainer and I like it that way. You have left me with a problem. This process is so convenient I have nothing to complain about. Would you please add some hassles, and red tape for me? After all, what good is having to deal with a government agency if you can't do any good griping about it?"*

-Mathew; Resident of Anchorage, AK
