

**NO to gas leaks and new gas pipelines  
YES to renewable energy**

Mothers Out Front in Massachusetts is demanding that utilities **build clean**. As mothers and consumers, we want **renewable sources for all new energy needs**. Our children depend on us to act now for their health today and livable climate tomorrow.

We have the solutions. Now we need:

- people to demand them,
- leaders to require them,
- and utilities to deliver them.

And we need you. Bring your voice and your actions to our statewide movement!

Our local teams of mothers are mobilizing to

- require utilities to fix the 16,000+ gas leaks in our state.
- reject new gas pipelines, compressor stations, and gas plants.
- demand local renewable energy projects that use the power of the sun, wind, and water.

**When we can speak up together as mothers and customers, we bring new power to the pressure on utilities and elected officials.**

Join us in taking bold, direct action to demand a safe, just, healthy Massachusetts for all children now and for a livable climate tomorrow.

Mothers Out Front is building a national movement of mothers, grandmothers, and caregivers dedicated to convincing elected officials and business leaders to work for a swift, complete, and just transition away from fossil fuels to clean and renewable energy.

**OUR GOAL IS SIMPLE:** To enable mothers to take active leadership in protecting our children.
