

NALEO

***National Policy Institute on
Emergency Preparedness And Response Management***

Debra Lowrance – Senior Director, Clinical Auditing Compliance

September 14, 2018

Emergency Planning and Preparedness for Healthcare Facilities

➤ Objectives:

- Provide an overview of the four key phases healthcare facilities take into account in the emergency preparedness and response plans.
- Highlight the leadership role local policymakers can play in the response phase, to help lead, inform and organize the community during that critical phase.
- Share best practices on how policymakers can help support and work closely with healthcare facilities in their communities, to make sure these have the resources and systems needed to prepare and respond to an emergency.

Emergency Planning and Preparedness for Healthcare Facilities

Provide an overview of the four key phases healthcare facilities take into account in the emergency preparedness and response plans.

- Mitigation
- Preparedness
- Response
- Recovery

Emergency Planning and Preparedness for Healthcare Facilities

Highlight the leadership role local policymakers can play in the response phase, to help lead, inform and organize the community during that critical phase.

Judge Clay Jenkins

“You can never not lead”

J.J. Watt

Emergency Planning and Preparedness for Healthcare Facilities

- Share **best practices** on how policymakers can help support and work closely with healthcare facilities in their communities, to make sure these have the resources and systems needed to prepare and respond to an emergency.

Begin at the beginning

Hazard and Risk Evaluation

Develop potential solutions

Draft a playbook

Hold table top exercises (discussions)

Rehearsals

NALEO – Thank you very much.
