Please note:

The National Immunisation Register is not a complete record of influenza immunisation. Many vaccines are not recorded, such as those given in workplace occupational health programmes. The influenza vaccine is also not funded for everyone aged under 65 years. The most accurate data is for people aged 65 and older and the influenza vaccine is funded for all people in this age group. There is also a target to immunise 75% of people aged 65 and over.
