BEHAVIORAL HEALTH DISORDERS  
PREVENTION, TREATMENT, and RECOVERY  
CANDIDATE SURVEY**

**I. General Views on Alcohol and Drug Disorders Policies to Address Stigma**

Alcohol and drug disorders have only recently become recognized as chronic diseases, much like diabetes or hypertension. Yet the stigma associated with them continues to persist and often prevents people from seeking the treatment they need, contributing to disease severity and adding huge costs to public programs.

Indicate which principles (if any) you agree with regarding your general views of alcohol and drug addiction (Substance Use Disorder) and recovery policies to address behavioral health issues by placing a check mark next to the letter(s) that correspond with your opinions.

a) Substance Use Disorders are preventable, treatable, chronic diseases and are as diagnosable/treatable as diabetes, asthma and hypertension.

b) Addiction is a matter of will. Government assistance is warranted, but ultimately, recovery is the individual's choice.

c) I would support sufficient funding to ensure that treatment and recovery services are available to those who need them.

d) The criminal code (Title 2C) should be examined as to whether the state's drug laws ought to be re-worked
